

Black Metal Hot Shoe Cover for Sony A6500 A6300 A6000 A3000 A7RM2 A77M2 NEX-6 Camera Product Manual

1. Product Basic Information

Product Name: Black Metal Hot Shoe Cover for Sony A6500 A6300 A6000 A3000 A7RM2 A77M2 NEX-6 Camera

Product Specification: This product is a professional camera hot shoe cover, specially designed for Sony camera models including A6500, A6300, A6000, A3000, A7RM2, A77M2 and NEX-6. It is made of high-quality metal material (aluminum alloy), through precision CNC machining and black anodizing treatment, presenting a sleek all-black appearance that perfectly matches the Sony camera body, while being sturdy and durable, anti-corrosion, wear-resistant and scratch-resistant. The hot shoe cover adopts a standard ISO 518:2006 hot shoe interface design[3], which is precisely matched with the hot shoe slot of the specified Sony cameras, ensuring a tight fit without loosening or falling off. Its main function is to protect the camera's hot shoe interface (including internal metal contacts) from dust, water droplets, debris and oxidation, avoiding signal failure or contact damage caused by contamination. The product is small in size, lightweight (only 3-5g), does not add extra burden to the camera, and is easy to install and disassemble. The surface is smooth and burr-free, with a matte black finish that resists fingerprints and maintains a clean appearance, suitable for daily camera storage, outdoor shooting and daily carrying scenarios.

Note: All information in this manual must be consistent with the product detail page, outer packaging and actual products to avoid non-compliance due to information inconsistency. The product's metal material, surface black anodizing coating and internal fasteners comply with EU RoHS 2.0 Directive (2011/65/EU) hazardous substance restrictions, and do not contain prohibited harmful substances (lead, mercury, cadmium, hexavalent chromium, PBBs, PBDEs, etc.)[4]. It is strictly compatible with the specified Sony camera models; do not use it for other brand or model cameras to avoid poor fit or damage to the camera's hot shoe.

2. Product Description & Usage Instructions

2.1 Product Function

This product is a dedicated hot shoe protection accessory for Sony cameras, mainly used to protect the hot shoe interface of Sony A6500, A6300 and other specified models. The camera's hot shoe is a key interface for connecting external accessories such as flash, microphone and GPS locator[3][7], and its internal metal contacts are easily contaminated by dust, moisture or scratched, leading to poor contact or functional failure. The black metal hot shoe cover effectively solves this problem by fully covering the hot shoe slot and contacts, preventing dust, water vapor, debris and other impurities from entering, and avoiding oxidation and corrosion of the contacts[6]. The sturdy metal structure can also prevent accidental collision or extrusion from damaging the hot shoe interface, extending the service life of the camera. The all-black metal appearance is consistent with the design style of Sony cameras, enhancing the overall aesthetics of the equipment. In addition, the hot shoe cover can be installed permanently when no external accessories are used, without affecting the camera's normal use, carrying or storage.

2.2 Usage Steps

1. Preparation: Check that the product is intact, the surface is free of scratches, deformation or oxidation, and the interface is smooth and burr-free. Ensure that the camera used is one of the specified Sony models (A6500, A6300, A6000, A3000, A7RM2, A77M2, NEX-6). Turn off the camera power and check that the camera's hot shoe slot is clean and free of dust, debris or oxidation[6].
2. Installation: Align the hot shoe cover with the camera's hot shoe slot (align the positioning notch of the cover with the protrusion in the camera's hot shoe), gently insert it into the slot, and rotate it clockwise 15-30 degrees until it clicks into place. Ensure that the hot shoe cover is tightly fitted with the hot shoe slot, without looseness or shaking, and that it fully covers the hot shoe contacts.
3. Use & Disassembly: When the hot shoe cover is installed, it can be used normally for camera storage and shooting, effectively protecting the hot shoe interface. When you need to use external accessories (such as flash, microphone), turn off the camera power first, rotate the hot shoe cover counterclockwise 15-30 degrees, and gently pull it out of the hot shoe slot. After using the external accessory, clean the hot shoe slot with a dry soft cloth, and reinstall the hot shoe cover to continue protecting the interface.
4. Storage: When the hot shoe cover is not installed on the camera, store it in a dry, clean and small storage bag to avoid loss, collision or oxidation. Do not place it with sharp objects to prevent scratching the surface black coating.

2.3 Usage Restrictions

1. This product is strictly dedicated to Sony A6500, A6300, A6000, A3000, A7RM2, A77M2 and NEX-6 cameras; it cannot be used for other brand cameras (such as Canon, Nikon) or other

Sony camera models (not in the specified list), otherwise it may cause poor fit, failure to install, or scratch the camera's hot shoe slot[3].

2. Do not use excessive force when installing or disassembling the hot shoe cover, so as to avoid damaging the camera's hot shoe slot, internal protrusions or the hot shoe cover itself; operate gently and follow the correct rotation direction.

3. Do not use the product in humid, high-temperature (above 60°C), low-temperature (below -10°C) or highly corrosive environments; avoid direct sunlight, rain or contact with corrosive substances (such as acid, alkali, seawater), to prevent the hot shoe cover from rusting, oxidation or the black coating from peeling off[4].

4. Do not use the hot shoe cover to fix or carry the camera, and do not place heavy objects on the hot shoe cover, otherwise it may cause deformation of the hot shoe cover or damage to the camera's hot shoe interface.

5. This product is a camera hot shoe protection accessory; do not use it for other purposes, and do not disassemble, modify or bend the product structure at will, so as to avoid structural damage.

6. Do not touch the camera's hot shoe contacts or the inner side of the hot shoe cover with wet hands or metal objects, to avoid static electricity or short circuit that may damage the camera's electronic components[6].

3. Safety Warnings & Precautions

Warning! Please read and follow all warnings and precautions carefully to avoid damage to the product, camera, or personal injury caused by improper use. The camera is a precision electronic device, and its hot shoe interface is fragile; improper operation may cause equipment damage.

1. This product is small in size and contains small metal parts; it is not suitable for children under 36 months old to use alone; keep it away from children to prevent accidental swallowing, scratching or pinching.

2. Do not disassemble, modify or bend the product by yourself; if there is a fault (such as deformation, loosening, coating peeling, or failure to install), stop using it immediately and contact after-sales service for professional guidance. Unauthorized modification will void the warranty and may cause damage to the camera.

3. When installing and disassembling the hot shoe cover, ensure that the camera is placed on a flat and stable surface, or hold the camera firmly with one hand, to avoid the camera falling due to accidental slipping, resulting in equipment damage or personal injury.

4. Do not touch the hot shoe cover or camera hot shoe with wet hands or directly touch the surface coating with corrosive liquids (such as alcohol, detergent); wipe the product with a dry

soft cloth when cleaning to avoid rusting, coating damage or camera hot shoe corrosion[4].

5. Before installing the hot shoe cover, ensure that the camera's hot shoe slot is clean and free of debris; do not install the hot shoe cover with debris in the slot, to avoid scratching the hot shoe contacts or causing poor fit.

6. When carrying or storing the product, avoid collision, extrusion or falling; place it in a dedicated small storage bag to prevent structural deformation, surface scratches or loss. Do not mix it with other sharp or heavy objects.

7. In winter or dry environments, avoid touching the hot shoe cover and camera hot shoe with hands directly after rubbing (to prevent static electricity), which may cause static electricity to damage the camera's electronic components[6].

4. EU Compliance Information

4.1 Compliance Mark & Relevant Certifications

1. CE Mark: This product complies with the requirements of the EU General Product Safety Regulation (GPSR) (EU) 2023/988. The CE mark is clearly visible on the product body or outer packaging, with a size not less than 5mm, no deformation or fading, and is permanently attached, which is convenient for EU market supervision and inspection.

2. RoHS Compliance: This product complies with the EU RoHS 2.0 Directive (2011/65/EU) and subsequent amendments, including the 6 core controlled substances (lead, mercury, cadmium, hexavalent chromium, PBBs, PBDEs)[4]. The content of hazardous substances in metal materials, surface black anodizing coatings, and internal fasteners meets the EU limit requirements (cadmium $\leq 0.01\%$, others $\leq 0.1\%$), without containing prohibited harmful substances. Relevant test reports and material declarations (MSDS/SDS) are retained for supervision and inspection[4].

4.2 EU Authorized Representative (EC REP) Information

Company Name: CET PRODUCT SERVICE LTD.

Address: Osterholzallee 144, 71636 Ludwigsburg, Germany

Contact Information: Tel:+497-1416432236; Email address:info.cetservice@gmail.com

Note: The EU authorized representative information must be consistent with the signed agreement, and false or expired EU representative information is strictly prohibited. The EU authorized representative is responsible for receiving and handling inquiries and supervision matters from EU market supervision departments on behalf of the manufacturer, and assisting in providing relevant compliance documents (such as DoC, material declaration) when required[4].

4.3 Applicable EU Directives & Standards

1. EU General Product Safety Regulation (GPSR) (EU) 2023/988
2. Restriction of Hazardous Substances Directive (RoHS 2.0) 2011/65/EU[4]
3. This product meets the relevant harmonized standards of the EU for camera auxiliary equipment, and the technical documents (including Declaration of Conformity (DoC), material declaration, safety test report, RoHS test report, etc.) are kept for at least 10 years for inspection by EU market supervision departments[4].

5. After-Sales Guarantee

1. Warranty Period: In accordance with AliExpress platform requirements, the minimum warranty period is 30 days; it is recommended to provide a 90-day warranty period for this product to improve customer trust.
2. Warranty Scope: During the warranty period, if the product has quality problems (such as deformation, loosening, coating peeling, oxidation, or non-compliance with EU RoHS/GPSR standards) under normal use, we provide free replacement or refund services. The warranty does not cover damage caused by man-made factors (disassembly, modification, improper use, collision, extrusion, falling, contact with corrosive substances or water), natural wear and tear, or damage caused by using non-compliant cameras.
3. After-Sales Contact: 【Please fill in your AliExpress store customer service email or AliExpress store link; it is not recommended to use domestic mobile phone numbers】
4. Complaint Handling: For product quality or compliance-related complaints, we will respond within 48 working hours and provide a reasonable solution (replacement, refund, technical guidance, return and exchange) in accordance with EU regulations and AliExpress platform rules. For complaints involving EU compliance issues, we will provide relevant technical documents and certification materials to assist in handling[4].

6. Other Instructions

1. Language Description: This manual is in English, which meets the AliExpress EU market language requirements. AliExpress has launched an AI translation function, which can automatically translate this manual into other EU official languages to meet the language requirements of different EU member states.
2. Disposal Instructions: This product is mainly made of recyclable metal materials. After use, please dispose of it in accordance with the EU WEEE Directive (Waste Electrical and Electronic Equipment Directive) and local environmental protection regulations[4]. Do not discard it at will; metal parts should be sorted and recycled separately to avoid environmental pollution, in line with EU RoHS and environmental protection requirements[4].

3. Document Update: This compliance manual will be updated in a timely manner in accordance with the changes of EU regulations (such as RoHS, GPSR) and AliExpress platform rules. The latest version shall prevail.

4. Compliance Commitment: We solemnly commit that this product and its packaging, instructions fully comply with the relevant regulations of the EU (including GPSR, RoHS 2.0) and AliExpress platform. If there is any non-compliance, we will bear all corresponding responsibilities (including product removal, fines, compensation for losses, etc.)[4].

Manufacturer: Shenzhen Dister Photography Equipment Co., Ltd.

Manufacturer Address: 4th Floor, Building 63, Majialong Industrial Zone, Nanshan District, Shenzhen City
